

Guidelines for Course Project

To finalize the course project topic, select 3-4 recent papers from high-quality conferences and journals to set the baseline. One can compare the results from different papers or try different controllers studied in class. Before finalizing the topic, you must get my approval.

The project carries 30% weightage, which will be divided into the following stages:

- Stage 1: Finalization of the problem statement and its submission as a report. At this stage, submit a preliminary report containing a description of the system and the problem statement.
- Stage 2: Understanding the methodology and proposing a new methodology along with analysis and submitting it as a report.
- Stage 3: Submission of the final project report and working code for implementation.
- Stage 4: Submission of the presentation.
- Stage 5: Final presentation with Q & A.

Stage	Weightage	Deadline
Stage 1	3%	10th March 2026
Stage 2	4%	31st March 2026
Stage 3	9%	two days before presentation
Stage 4	4%	one day before presentation
Stage 5	10%	TBA

One can earn extra points by proposing a novel idea that could lead to a research article. Marks in the range [5, 10] will be added to the final total of the course out of 100.

Guidelines for report preparation

1. Prepare the report in LaTeX. Use documentclass ‘article’ or ‘report’. Single-column format.
2. Equations should be typed, not copied from sources.
3. Prepare figures using any tool you prefer, but do not copy-paste the figure unless it is very complicated. Give a proper citation of the figure if you are using the existing one from the literature.
4. The plots generated from the code should be included in the report and PPT with proper thickness of line, font size of 14 for axes, and label so that figures are properly visible.
5. You can prepare a PPT in Word or Latex.
6. Include a list of references and cite them properly.

The presentation time is 15 min, and 5 min for Q & A.

All of you are required to be present for the whole duration.

Note: I will keep updating this PDF if something else needs to be added.
